# STATS

1 in 3 women will have an abortion at some point in their life

1 in 5 women will be sexually assaulted at some point in their life

1 in 3 women who suffer the loss of a pregnancy are affected from PTSD

1 in 5 pregnancies will end in a miscarriage

Women aged between 16-24 are more likely to have an abortion than any other age group and twice as likely if they live in a poor area

# “CHLOE” & “STACEY”

“I had been sexually abused my whole life. When I got to college I was raped by one of the lecturers, he was married and had children and so he told me that if I didn't terminate the pregnancy he would kill me, he pointed out the window to the river and said he'd drown me, I was terrified. I was 16.”

“The Ayrshire pregnancy crisis centre saved me, they coached me through that rough time in my life and the aftermath that followed”

“I had an abortion when I was 14, I had nobody to help me, I was so scared. When I turned 50 and the menopause happened it brought back the emotions I felt when I was young. I was a wreck but the APCC helped me get back on track and finally move on”
