

MARR COLLEGE PROJECT

Stakeholder Newsletter

No.2 - Januarv 2016

PROGRESS UPDATE...

After a month of dreadful weather, it's great to confirm that the wind, rain and snow hasn't stopped the Marr College Project from keeping to the programme.

The concrete frame to the rear of the existing Historic Building is nearly complete up to and including the new school entrance. On the roof of the Historic Building, slating and lead work is now progressing well.

ABOUT THE PROJECT:

Hub South West Scotland is delivering the Marr College project on behalf of South Ayrshire Council. Hub South West have appointed Kier Construction as the Construction Delivery Partner for Marr College. Designed by BDP Architects this build will increase the school's capacity to 1,360 pupils in time for the August term in 2017. A single-storey sports facility will also be built which will benefit not only the school but the local community too as it will be accessible to the wider community out with school hours.

HOW CAN YOU HELP US?

We all know that building sites can be dangerous places if rules are not adhered to and it is very important that the site is not treated as a playground. Everyone should be aware of the danger, if entering onto a building site without permission and we urge all parents make their children aware of this. We will of course be vigilant in this regard and we will continue to monitor the perimeter and site at all times. The safety of your children and the public is of paramount importance to us and together we can ensure that this is not compromised in any way.

LOOKING FORWARD...

COMMUNITY ENGAGEMENT

Hub South West and Kier have arranged various training courses for local businesses, including asbestos awareness training, advanced health & safety and leadership & management training.

We are delighted to have formed alliances and partnerships with various local agencies. This will continue to produce recruitment and training opportunities for local businesses.

CONSIDERATE CONSTRUCTORS SCHEME

The primary aim of the Considerate Constructors Scheme (CCS) is to improve the image of construction by encouraging the highest standards of conduct across the industry.

Participating sites must sign up to the CCS Code of Considerate Practice. Projects are scored according to how well they perform in each of the eight section of the code: Considerate, Environment, Appearance, Good Neighbour, Respectful, Safety, Responsible and Accountable.
