

I like Physics because there is a wide variety of topics and they are all really interesting and you get to do a lot of cool experiments.

Julianne, S3

I like Physics because it gives you a better understanding of our universe.

Finlay, S4

I like Physics because it makes you think about the forces that we take for granted like gravity.

Jennifer, S6

I like Physics because I prefer the logical thinking involved compared to other subjects. I also like the challenge.

Connor, S5

I like Physics because I enjoy learning about Newton's Laws because it is interesting to learn about forces and calculating your weight on Earth and the rest of the planets in the Solar System.

Jordan, S3

Why Physics?

- Interesting topics
- Fun experiments
- Suitable courses for all
- Knowledgeable and enthusiastic staff
- Develop problem-solving skills
- Excellent career options

I like Physics because you get to learn about the largest things in our Universe right down to the smallest. It also teaches you about how cars move, how balls roll and why the Moon orbits the Earth.

Michael, S5

I like Physics because I enjoy it and enjoy using formulas and learning about the different topics.

Erin, S3
